HISTORY

DTA is a family owned company founded in 1972 as a company specialized in design and production of custom solutions for site transportation. DTA started in 1972 as a commercial company selling foreign equipment in Spanish shipyards.

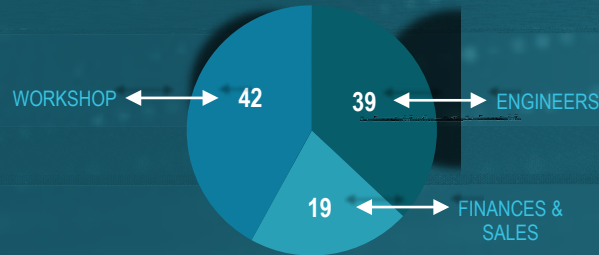

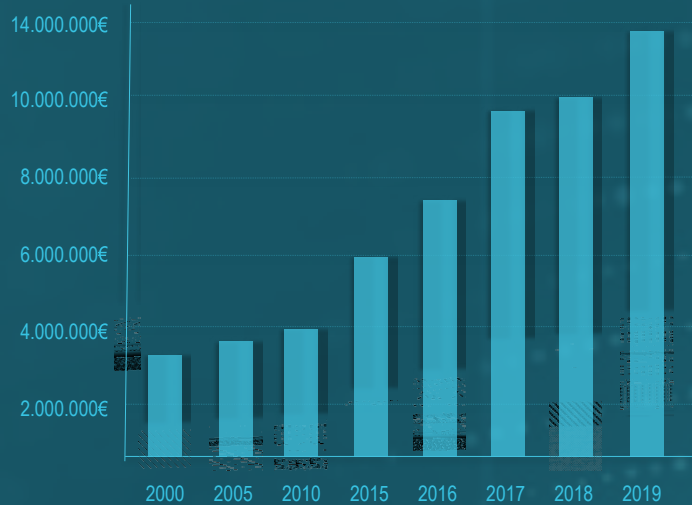

After that, we started to produce our own solutions but outsourcing the engineering from a German company.

- 1972 | Company founded.
- 1975 | Mechanical engineering outsource.
- 1995 | DTA designed its first 250 Ton vehicle.
- 1999 | DTA started complex projects which included engineering capabilities (design, integration and tests) and production.
- 2004 | DTA was awarded with the first contract for the design and manufacturing of AGV for aerospace sector.
- 2005 | Engineering Dpt implemented CAD solutions for design.
- 2006 | Unit n°100 was successfully delivered
- 2008 | First AGV 100% designed and manufactured by DTA.
- 2012 | DTA opens its new facilities in Torrejon de Ardoz (Madrid).
- 2018 | Due to new capabilities and production increase, DTA starts a new project for the construction of a new factory. Start activities are planned for 3rd Q2019.

DTA IN DIFFERENT INDUSTRY SECTORS

Iron and Steel

We supply different vehicles and AGVs to transfer coils, billets, steel and -rolling rolls.

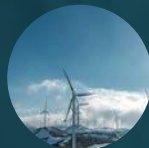

Aeronautic

Our AGVs are present in this sector to move fuselage parts as well as assembly lines. Most of aircrafts manufacturers and subcontractors trust in our solutions to transfer their products.

Shipbuilding

We have more than 45 years of experience supplying transfer vehicles as well as other system solutions to move steel blocks, plates, motors, etc.

Wind sector

Our platforms are currently present in this sector to move nacelles and towers of the most import manufacturers of wind turbines towers worldwide.

Automotive

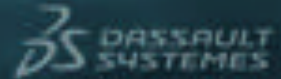

Our electric cart vehicles move molds of 80 tons being able of combining several systems for different steering modes adapting to customer's needs.

Nuclear Plants

Many of our AGVs and electric vehicles move containers and radioactive loads. We produce sturdy vehicles which comply the most demanding regulations in the industry to transfer the load with no risk for the operator.
